

## **Digital Photography: Store, Share and Organize Your Photos**

This workshop is appropriate for those with no prior knowledge of digital cameras.

Learners will be guided what to do with those thousands of photos going back years from any typical smartphone or camera memory card. Then find a place where somebody can enjoy them. Learners who have media, such as screenshots or family photos will learn how to post them on the Internet, make them into books or let friends and family print copies.

The workshop explains the basic steps to continue with your pictures workflow: image quality, upload and edition, find photos by date, by tags, sharability and printability.

### **Duration:**

3 hours workshop.

### **Equipment:**

Camera and Digital media.
